

ROBYHEAD L

3-axis Gyrostabilized Head For Studio Cameras.

ROBYHEAD L is the largest head of RobyHead family and it is designed to work with studio cameras. The carbon-fiber body of the head makes it extremely lightweight for its size, which allows working on lighter cranes.

Remote Head Specifications

- Weight: 13 kg
- Load capacity: 15 kg
- Speed: 0.01-60 °/s
- Voltage: 24 V
- Suitable for outdoor use

Key Features

- 3-axis digital gyrostabilization.
- Autohorizon
- Carbon-fiber body for low weight and great outlook
- Digital interface to Canon and Fujinon motorized lenses
- Custom lens motors supplied on request
- Long-distance serial control interface
- Zoom compensator for smooth operation at tele zoom range
- Smooth operation, soft start-stop

Control Panel

The control unit incorporates high-precision sensitive joystick and lens controls (zoom / focus / iris). A menu screen is available for settings adjustments.

Tracking capabilities

The head may be integrated with an external optical tracking system or provide camera position and orientation data from its sensors and the lens.
